### The Training Workshop for the Teachers

*"In learning you will teach, and in teaching you will learn."*

Phil Collins

**Vice** Chancellor, University of Balochistan Prof. Dr. Javeid Iqbal has called on the teachers to play their vital part in improving quality of education in the province. The teachers are reformer and builder of nation. The person who can not communicate the ideas to other students, he is not teacher.

He was addressing the training workshop for the teachers. He said that teaching is a very elegant profession as such those associated with it have to realize significance of the profession and fulfill their noble responsibilities. Teaching is an art, and it should be learnt. The teacher should learn the class dynamics.

He said that the UoB is providing opportunities of higher education to the students at their doorstep. University is called as high seat of learning.

He noted with contentment that the University has attained its due status among the best educational institutions of the country. This was possible only because of the hard work of the teachers and dedication of the students, he commended.

The Vice Chancellor however stressed that the teachers should build their professional capacity further, rather, the research culture should be promoted as the developed and civilized nations have attained the status

through modern Technology and research, his maintained. Research opens the new avenues of knowledge and information. He realized that still there is a deficiency of original research work, publications and research projects. The teacher should not play merely a role of a traditional teacher, but a modern and original researcher.

*"I like a teacher who gives you something to take home to think about besides homework."*

## Evolution of Pharmacy (Laraib Jamil)

*Wherever the art of Medicine is loved, there is also a love of Humanity."*

**When** man stepped on earth, he has to face many problems either it was of technical or financial or related to Medical field. An old proverb "Necessity is the mother of invention" in past man was used to sort out his problem himself.

Ancient man learned from observation of beasts and birds, cold water, and mud. He made them his source of satisfaction and pleasure they he analyzed experimentally and utilized his derived knowledge for others benefits. Those procedures were not modified as in modern world but the present techniques and creatures are the shadow techniques and creatures are the shadow of those interventions. In past there was illness but not physician so people used to treat themselves, sometimes they treat them apantical or fail. This was the reason of high death rate in past.

Malaria was contagious disease, which affected million of people. Due to lack of treatment many people died. With the passage of time a bart named as "Cinchona" was introduced. Which proved beneficial for the treatment of malaria and it also controlled death due to malaria. Actually the evolution of Pharmacy was come into being in same era. Pharmacy is developing parallel to man. In past people utilized herbs but they were not familiar to the word "Pharmacy"

Word "Pharmacy" introduced in 15th century which is derived from Greek word Pharma-gos. People assume medicine, herb, poison and magic in the circle of pharmacy.

According to history the pharmacy came into being before Islam. And Arabs are known the cradle of

### Hippocrates

civilization. Arabs created first physician and pharmacist (about 2600 BC) and their methods found counterpart in modern pharmaceutical care.

History reflects that very first medical store was established in "Baghdad" late in eighth century. Sweet syrups obtained from natural resources, alcoholic liquids and privately owned drugs are stored in the shop, and give the idea to others.

Now a days pharmacies in hospitals are very important element and this element

should integrated with other elements. Origination of Hospital Pharmacy began from America "Philadelphia" in 1752. And the first hospital pharmacist was "Jonathan Roberts" whose practice was unelectable for the profession of Pharmacy. He worked with his co-workers and also counsel about practice and prescription. By his work Jonathan was also the introducer of Pharmacy and Pharmacy practice.

Pharmacists achieved title "Profession" as a reward after serving humanity for centuries. Pharmacist is an excellent profession in our community.

Modern Pharmacist not only dispenses drugs or medicines according to written prescription but he also engages the patient with the rationale use of drug, compliance, Behavioral compliance and effective use of drug for more better outcomes, in short he offering his responsibilities honestly.

Either it would be a field of education or research, a way to development or standard for development a pharmacy profession will transmit from teacher to students and from father to son.
